10. Recommendations and resolutions of the directors in connection with the distribution of the dividend pursuant to Regulation 37(a)(1) of the Securities' (Periodic and Immediate Reports) Regulations, 5730 – 1970:

Following the update to the Company's dividend distribution policy, as reported by the company on May 18, 2025 (Reference No: 2025-01-034416), the dividend distribution will be carried out starting from the Company's financial statements dated March 31, 2025, on a quarterly basis instead of a semi-annual basis. No changes have been made to the other terms of the distribution policy, and the Company will

distribute an annual dividend at a rate not less than 40% of the Company's total distributable profit according to its financial statements for the relevant year. It should be clarified that amounts used by the Company for share repurchase programs are not included in the dividend distribution.

Regarding the current dividend distribution, it has been determined that according to the Company's financial statements results dated March 31, 2025, the distributable profit according to the provisions of the Companies Law, 1999 ("Companies Law"), amounted to approximately 10.8 billion NIS, thus the distribution meets the "profit criterion" as defined in the Companies Law.

For the purpose of examining the Company's compliance with the "the ability to meet liabilities criterion" as defined in the Companies Law, the Company ensured that the dividend distribution does not prevent the Company from meeting its existing and expected obligations when they become due. The Company's board of directors believes, after examining the impact of the distribution on the Company's financial condition, its expected cash flow, its capital structure, its liquidity status, and its compliance with existing financial covenants, that the execution of the distribution does not prevent the Company from meeting its obligations as mentioned.

It should be noted that the board's decision is also based, among other things, on the distribution of dividends from the subsidiary companies to the Company, which have accordingly updated their distribution policies to quarterly distributions.

Accordingly, the board of directors has determined that the distribution is in accordance with the distribution criteria set forth in the Companies Law and does not negatively impact the Company's financial condition.
